Product Compatibility List

30 October 2017

PrintBoss ships ready to interface with several software packages. Each standard interface has at least one check form made to fit the check stock that comes pre-bundled with PrintBoss. Some interfaces include additional forms. PrintBoss is capable of working with more than one Host Accounting Software program simultaneously. All of our standard interfaces are in English.

All of our standard interfaces are 'check at the bottom' of a letter sized page. Our standard check forms place the check at the bottom for two reasons:

- Banks prefer the MICR edge to be the clean edge of the paper (easier for processing by equipment).
- Most of our standard forms provide a mini copy of both the check and advice on the top portion of the page. This very popular option often eliminates the need to make additional copies of checks for record keeping.

The list of our standard interfaces includes the following Windows based products:

PrintBoss Select - *Checks & Deposit Slips; Unlimited bank accounts; Auto selection of bank account*

QuickBooks by Intuit
QuickBooks Enterprise
QuickBooks Online
